

ASYNC JAVASCRIPT

* JAVASCRIPT (BY DEFAULT)

↳ Synchronous

↳ Single Threaded (∴ slower than multithreaded lang.)

(but does not feel slow in run time environment like browser or node.js)

* Execution Context

↳ Each operation waits for the last one to complete before executing.

↳ executes 1 line of code at a time

↳ Console log - 1

↳ Console log - 2

CALL STACK

MEMORY HEAP

* Blocking Code vs. Non Blocking Code

↳ Blocks the flow of the program jbtK vo code run ni hojata.

↳ eg - Synchronously reading a file

↳ Does not block execution of the program.

↳ eg - Asynchronously reading a file.
